ABOUT ME

Since childhood my favourite pastime has been to make things.

Sometimes by taking apart toys, watches and electronic items to see how they worked; reassembling them to see if they would still work with fewer parts or make them work in a more interesting way.

Today I continue to be inspired by innovative approaches to creating and modifying products and services.

SIDE PROJECTS

Created a program to automate the data scrubbing and virus checking of client laptops.

Built a browser app to host exam questions, record scores and print exam result reports.

Built a Windows utility app to manage X500 directory trees, used by helpdesk and I.T support. A client funded future development of the app which was later sold to external clients.

Reverse engineered a major vendor's file server security in order to re-set a lost root admin password.

At a client's request, successfully legitimately hacked a major vendor's corporate wide messaging system to prove it was not secure!

EDUCATION

- Certs** + **Professional Qualifications**
IBM Domino Certified Developer & Administrator Novell Network Certified Novell Engineer.
- Cert Ed** + **Amersham & Wycombe College**
